

## MPL LAB

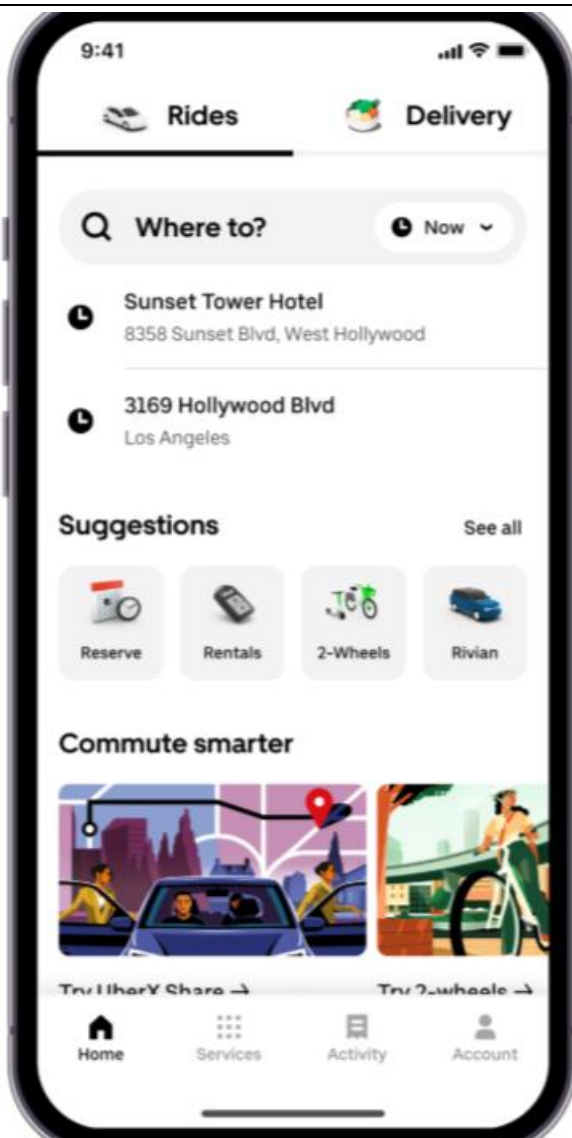

Aryan Dangat

D15A 12

**Aim:** Selecting features for application development, the features should comprise of:

1. Common widgets
2. Should include icons, images, charts etc.
3. Should have an interactive Form
4. Should apply navigation, routing and gestures
5. Should connect with Firebase database

Screenshot	Features
	<p>Landing Page-Sign in using email address</p> <p>Firebase for authentication</p> <p>Firebase</p> <p>a. User: Username, email and password.</p>

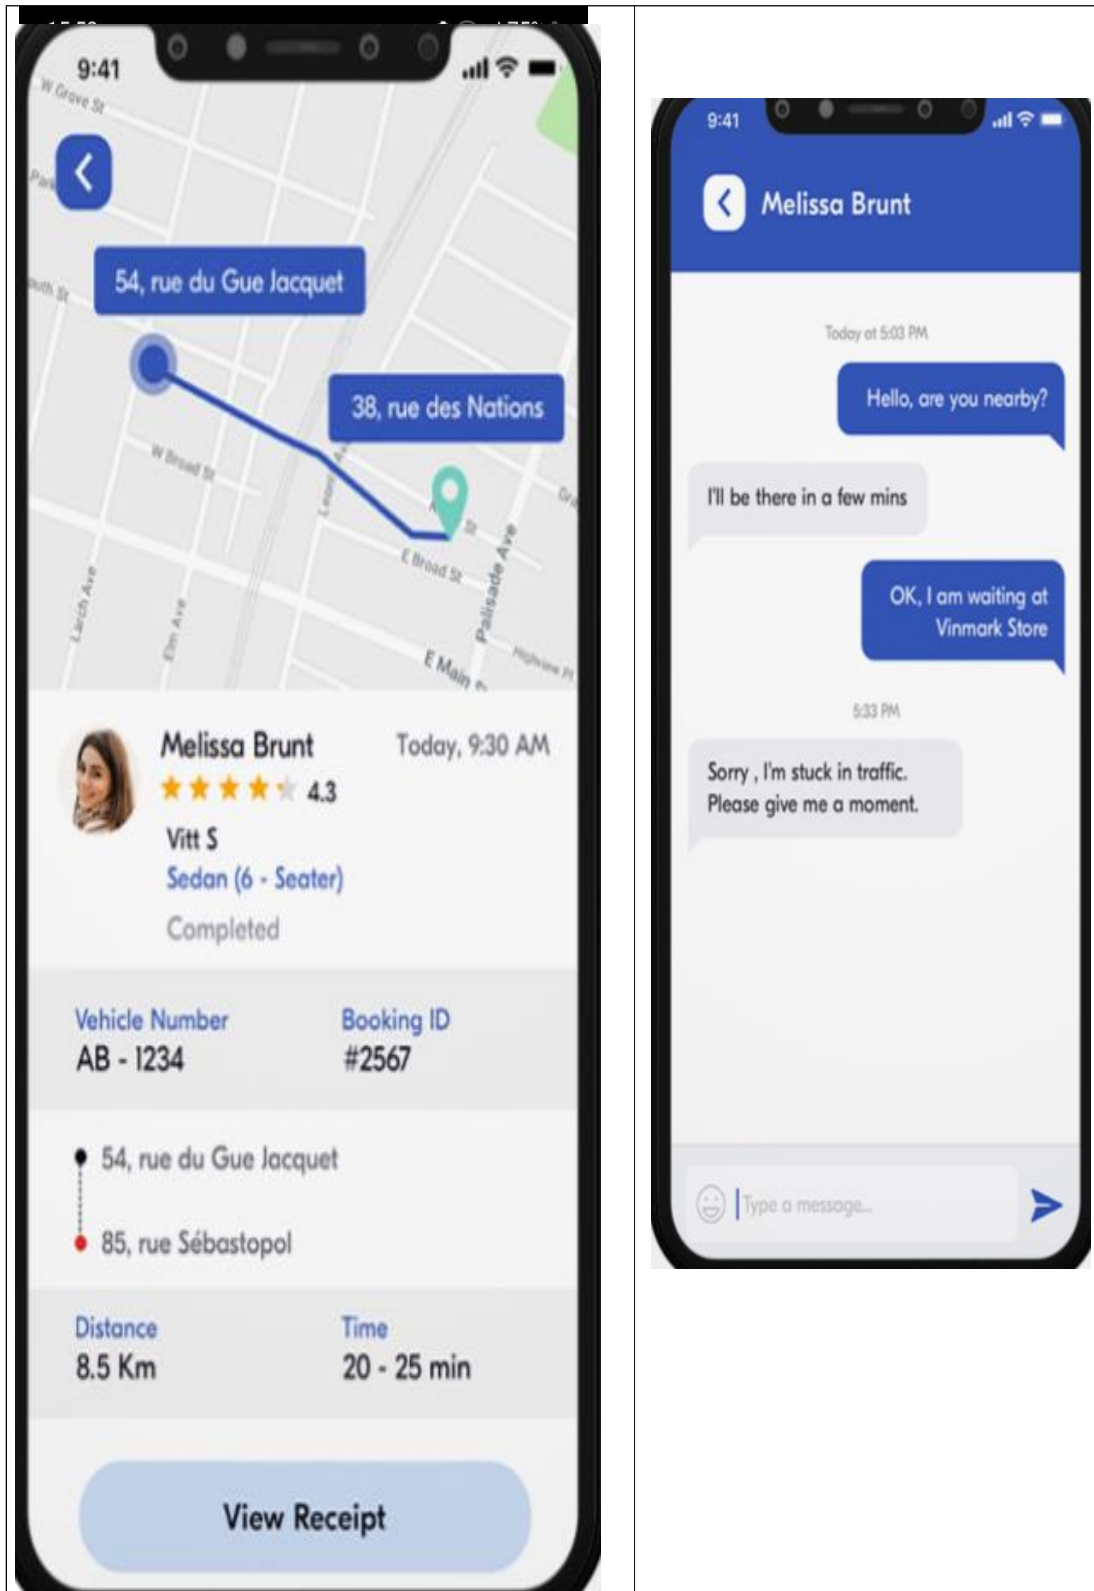

## User Homepage

1) Rides- Choose where you want to go along with the pickup location.

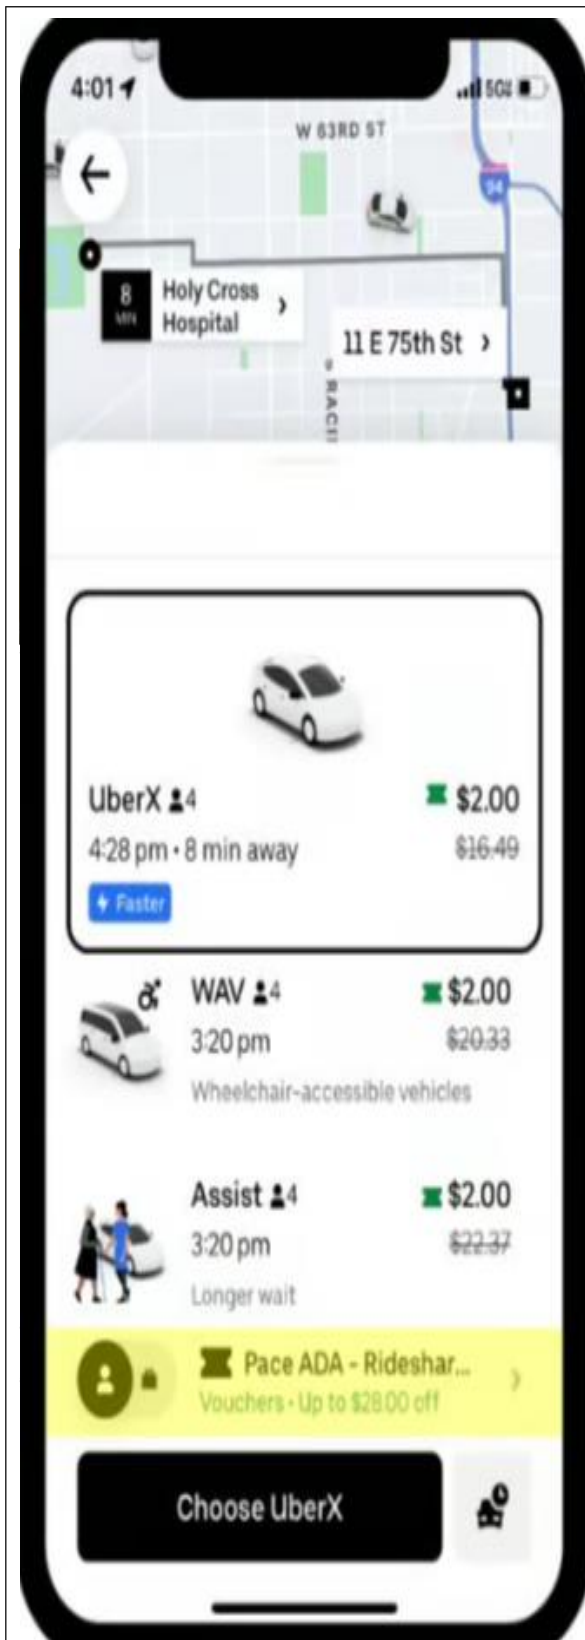

2) Try new features.

3) You can explore our suggestions for a better pick up.

4) Notifications- Alerts for timely updates regarding the ride and what not.

1. Here you can view updates about your ride, the time it will take to reach your location and the driver reviews and details.
2. You can even have a conversation with the driver in real time.

## Book a ride page

1) Search Bar-Allows users to type and search for keywords, location name etc.

2) The subsequent dropdown offers a range of options along with the current rates for the same.

3) Trending hashtags -It showcases the most popular and widely discussed hashtags currently trending on the platform.
